This is an awning with invisible arms that is perfect for a wide array of settings and reaches dimensions of up to 5.50 m x 3.25 m.

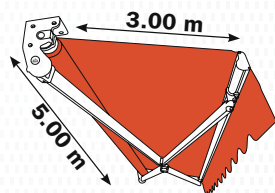

Ideal for installation

- On balconies
- On terraces

Dimensions

Dimensions with Texpro fabric protector

Mounting

- Wall
- Ceiling
- Between walls (except when the Texpro fabric protector is used with an exterior gearbox)

Operation

- Manual
- Motorised
- Automated

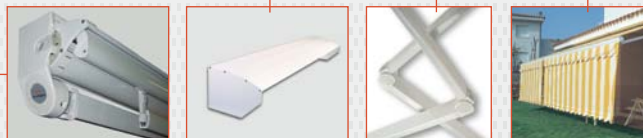

Finishes

- Lacquer in accordance with QUALICOAT standards
- Stainless steel screws and bolts

Accessories

- Texpro fabric protector
- Galaxia weather cover
- ART Crossed Arms Kit
- Sombrex System

European standard classification: Class 2

Features

- Compact and robust design.
- Conceals external mounting elements for a more streamlined look.
- Can be used with the Crossed Arm Kit which allows projections which are not limited by the width of the system.
- Very versatile, can be used with the Texpro fabric protector.
- ART 350 arms featuring the internal ART SYSTEM tension transmission system to improve the tension of the fabric and extend the lifespan of the system.
